- **Comprehensive UTM+ protection solution**
- **Cyber crisis expenses insurance**

An end-to-end solution for complete physical and virtual security

The world we live in now is increasingly connected, either through the numerous smart devices or the Internet we rely on heavily for home or for work, including cameras on our phones or in the surveillance systems in malls, and smart devices use in our offices and homes. All things networked could fall prey to hackers. As long as we leave a digital footprint, the risks and consequences of cyber attacks should not be underestimated.

Just as in the physical world, materials in the digital world have to be guarded. **Guardforce Real-time Insured Defence (GRID)** offers you an end-to-end solution for complete physical and virtual security.

GRID offers complete physical and virtual protection

IoT devices are vulnerable to cyber crimes

Conventional security devices offer limited protection

What is GRID?

The solution covers all devices that connect to internet – from computers, security cameras to mobile devices and all smart devices. When GRID's UTM devices are installed on your network gateway, all networks are safely protected and all data communication between the end points is secured by encrypted VPN tunnel.

The solution is suitable for offices, retail outlets, residential and other locations where networks need to be protected.

Expert 24 x 7 managed security service

Your network will then be guarded by a 24 x 7 managed security service supported by professional experts stationed at a security operations center (SOC).

- Real-time security update in less than 3 seconds
- Your network is remotely monitored and protected 24x7x365
- Global threats intelligence by cooperating with more than 70 global security partners
- Triple ISOD compliant

- Alert will be sent to client if issues with hardware units are found
- Professional, highly qualified in-house security engineers provide live support and response
- All SOCs are backup and support by 16 global networked SOCs

Comprehensive UTM+ protection solution

UTM+ is an all-inclusive security solution that provides a comprehensive set of security functions and technologies within one single unified system.

- 3-second response time to zero-day threats
- Tailor-made reports logging suspicious activities
- 24 x 7 professional monitoring service
- Secure all networked (IOT) devices

- The only "No Back Door" design for total security
- Certified, award-winning protection with PCI compliance
- Custom-made features for various business requirements
- Incoming and outgoing threat protection

Hybrid Firewall	Intrusion Detection and Prevention	Virtual Private Network
Anti-Malware	Zero-Day Protection	Content Filtering
Anti-Spam	Data Leakage Prevention	Anti-DDoS
Application Scanning and Control	Entity Management	Infected LAN
HTML-5 Dashboard	KPIs and Customized Reporting	SSL Proxying
IPv4 to IPv6 Bridging	Cloud email & DNS Backups	Real-time PUSH Updates

Cyber crisis expenses insurance

In the event of a cyber security breach, all expenses associated with rebuilding the reputation of the company, such as legal fees and costs of PR events, will be covered by the solution's protection plan.

Cyber crisis expenses insurance, offers first-in-the-market solution to protect corporate reputation from a data or security breach.

GRID's Benefits

Round-the-clock managed security service by professionals and experts

Private data fully secured

End-to-end, total protection from physical to the virtual dimensions

A fail-safe solution for both homes and offices
